

Get In Touch With Us.

Contact us today to find out how you can help close the loop on waste and make Africa greener.

"The greatest threat to our planet is the belief that someone else will save it."

~Robert Swan

About Us.

EcoLoop Solutions is a company passionate about putting the "Eco" back in "Economy" and providing sustainable solutions to achieve Environmental Sustainability Goals (ESG's).

We believe that waste is a valuable resource awaiting transformation.

That's why we develop and distribute innovative, eco-friendly equipment and products that help individuals, industries and communities easily embrace the culture of Recycology - Reduce, Reuse, and Recycle their waste, creating a closed-loop system that benefits the planet and its people.

Our Mission

To seamlessly integrate smart waste management solutions into everyday life.

ECOLOOP SOLUTIONS AFRICA LTD.

Closing The Loop On Waste.

Aerobin

The Most Advanced Static Home Composter.

Make your organic compost with the Aerobin Home composter, which is a versatile, innovative and easy to use organic recycling unit for your kitchen and garden waste.

Features:

- Available in 200Lt, 400Lt & 600Lt capacity.
- Easy to set up, no manual intervention required.
- Odour free composting, no chemicals required.

RVM – Reverse Vending Machines

An Innovative Incentivised Collection System.

These high-tech machines play a crucial role in promoting recycling and fostering sustainability in communities by incentivizing return of used plastic bottles and metal cans by rewarding users for depositing these containers.

Available in Basic, Pro & Prime models.

RVM – ECOLOOP PRIME
